

Industrial Weighing

Weighing & Measurement In Production Environments

METTLER **TOLEDO**

Industrial Weighing Solutions for:

- Food & Beverage Companies
- Chemical & Pharmaceutical Producers
- Metal, Plastic and Electrical Component Manufacturers
- Raw Material Production and Mining Facilities
- Engineering Firms, OEMs and System Integrators

Bench & Portable Scales

- Scales and Platforms from 0.6 to 600kg.
- For dry and wet environments with protection up to IP69k.
- Applications include counting, over/under checkweighing and completeness verification.
- High-precision models with Monobloc® load cells available.

Floor Scales & Heavy Duty

Terminals & Controllers

- Application terminals for standard and customized applications including over/under weighing, batching and filling.
- Basic weighing terminals.
- Easy on-screen notification and guidance.
- Connectivity to factory automation networks.

Hazardous-Area Weighing

Software Solutions

- Statistical quality control management.
- Guided formulation process management.
- Data collection and visualization.
- Vehicle-scale transaction management.

Components for Integration

Get the full catalog:

► www.mt.com/ind-catalog

- Models for dry and wet environments.
- Rugged and durable for different applications and operations.
- Wide range of sizes and mobility options.
- Heavy-capacity for industrial heavy duty applications.
- High-precision models available.

Load Cells & Weigh Modules

- Safe and easy installation.
- Wide range of capacities.
- Build-in safety features.
- Global approvals for legal-for-trade and hazardous areas.
- Real-time diagnostics allowing predictive maintenance to reduce downtime.

► www.mt.com/weigh-modules

- Platforms, terminals and accessories with ATEX, FM, IECEx and local approvals ensure compliance worldwide.
- Intrinsically safe weighing combines proven safety in hazardous areas with accuracy and performance.

Vehicle Weighing

- Truck scales with steel or concrete decks.
- Static or in-motion railroad scales.
- POWERCELL® PDX® load cells for maximum accuracy with minimized downtime.
- Kits for upgrading load cells on older scales.

► www.mt.com/vehicle

- Wide variety of platforms, weigh modules and load cells designed for integration into machines and instruments.
- Terminals for integration into process control systems or ERP systems via a range of protocols.

Accessories, Peripherals & Weights

- Test weights for routine testing.
- Ticket and strip printers.
- Secondary displays.
- Barcode readers for data capture and management.
